AGRI-INFRA ON DEMAND

Our “Food-Ag as a Service” (FAAS) model makes it easy for our clients to follow an asset-light approach and engage resources only on core-operations. We do the heavy lifting of making substantial investments in creating highly functional food-safe processing and storage environment.

*Founded in 1911, we are one of the
largest Agri-Integrated-Infrastructure
Food Hub in Southern Ontario.*

MILO-FAIS

Cold & Ambient Storage

We provide comprehensive range of customized warehousing solutions scalable to clients /product specific needs. Everything is handled professionally by expert staff with utmost personal care, whether it is few pallets or a full truck.

Refrigeration & Steam

Our facility is equipped and maintained for handling diverse food processing needs. We offer reliable, efficient, functional refrigeration and steam allowing clients to operate in a safe manner and deliver the best products to their customers.

Wastewater Treatment

Our best in class wastewater processing & management facility processes and release 300 – 400 million liters clean water to the Lake Erie every year. We help our clients meet strict environmental regulations and optimize their wastewater processes and costs with our intelligent measurement technology.

Agriculture

We have over 55 acres of fertile land that can serve as an outdoor research site for solving diverse agriculture problems or drive innovation. The site is suitable for crop testing, plant breeding, growing organic produce, creating Superior cultivar.

Project Management

Our more than 100 years of professional experience in the food processing and cold storage business puts us in a unique position to offer collaborative and scalable solutions to meet food processors needs for quality, budget and schedule.
